

□ Timeline of Stripe Record Manipulation - Proof of Merchant Deception

Subject: Stripe's silent modification of merchant registration data following consumer complaint.

Purpose: To demonstrate that Stripe knowingly altered the registered domain of a fraudulent merchant (Unthought LLC), thereby obstructing the verification of prior fraudulent activity.

◆ 1. June 8, 2025 - Initial Lookup Conducted

- I used Stripe's official [Charge Lookup tool](#) to verify three unauthorized charges made by **membeaner.com** on:
 - March 27, 2025
 - April 27, 2025
 - May 27, 2025
- Stripe returned the following for all three:

Business Name: Unthought LLC

Website: contact-genie.com

- These screenshots were saved and timestamped between **23:58 on June 8** and **00:02 on June 9**, with full metadata (attached as Exhibits A1 - A3).

◆ 2. June 9 - 12, 2025 - Complaint Filed

- I submitted these results to Stripe and my bank (China CITIC Bank), highlighting:
 - Domain mismatch: **contact-genie.com ≠ membeaner.com**
 - contact-genie.com has **no DNS records**, making it a **shell domain**
 - No services were provided, and the platform appeared to impersonate another educational tool (Membean)

◆ 3. June 18, 2025 - Silent Record Alteration Detected

- Upon revisiting Stripe Lookup, the **merchant registration was silently updated**:

Previous (June 8): contact-genie.com

Now (June 18): membeaner.com

- No public notice, email alert, or audit log was provided.
- The same search inputs now show altered results, contradicting the original lookup.

◆ 4. Technical Proof of Manipulation

Element	Value	Meaning
File Creation Timestamp	June 8, 2025, 23:58	Proves lookup occurred before alteration
Domain WHOIS/DNS	contact-genie.com has no A/SOA/MX/TXT records	Proves it is non-functional
Updated lookup	Now shows membeaner.com instead	Proves Stripe overwrote original data post-complaint

◆ 5. Consequences of Stripe's Action

- By retroactively altering the merchant's registration data, Stripe:
 - Obstructed regulatory review of initial fraud
 - Made it appear that **membeaner.com was legitimate** all along
 - Misled both my issuing bank and any third-party dispute evaluator (e.g., Visa, BBB)

◆ 6. Request for Action

- I request that the original lookup results (dated June 8 - 9) be taken as primary evidence.
- Stripe's silent update must be treated as **tampering with investigation material**.
- This case qualifies under:
 - **Visa Core Rule 5.2.2** (merchant registration must match operating domain)
 - **Zero Liability Policy** (unauthorized and deceptive online transactions)
 - **Stripe ToS 4.3** (prohibition on false/misleading domain use)

Attachments:

- Exhibit A1 - A3: Original Stripe Lookup screenshots (dated/timestamped)
- Exhibit B: DNS record from SecurityTrails (no records found for contact-genie.com)
- Exhibit C: Screenshot of altered lookup (post-June 18)
